

CELEBRATE ARBOR DAY

ARBOR DAY IS ALWAYS THE LAST FRIDAY IN APRIL

PLANT A TREE!

FOLLOW THESE STEPS FOR SUCCESSFUL TREE PLANTING

STEP 1

Plant your tree where it will get lots of sunshine and has room to grow! Dig a hole 10" deep and 8" wide.

STEP 2

Find your tree's **root collar**, a spot located just above the roots where the stem changes color or becomes fatter. Plant your tree at this depth or a half inch deeper.

STEP 3

Make sure your tree's roots hang freely in the planting hole and are not bent or twisted.

STEP 4

Replace the loose soil gently around your tree's roots.

STEP 5

Pack the soil firmly around your tree to remove any air pockets.

GOOD PLANTING JOB!

REMEMBER TO WATER YOUR TREE WEEKLY TO KEEP THE SOIL MOIST. YOU WILL HAVE TREE-MENDOUS SUCCESS!
